

TASKGATOR

Description

A peer to peer market place software that is simple, powerful and customizable. Taskgator is bundled peer to peer market place software that enables you to get started with your online service market place website or app. The software can easily be customized for other business verticals such as peer to peer service marketplace, peer to peer market place etc. Taskgator supports wide variety of task categories which further is divided into different sub categories at 2levels. Admin can add / manage different categories across multiple levels. It is for the startup business entrepreneurs that enables them to kick start their online service business. Taskgator is designed to let people connect with the other in neighbourhood to get their services completed.

The providers who wants to get their job or task done need to post their job on the taskgator.

Taskgator further suggest them the takers that are qualified to do that job along with providing other information such as hourly rates, experience etc.

The task poster later selects one tasker that he finds most appropriate.

The provider can accept or cancel the job as per his availability and convenience.

Once the tasker completes the tasks, the payment process is handled securely using this software.
